EXAMINER'S ACTION

Claims 1, 11, 17, 24, 31-33, 38, 40, 41 and 43 are rejected under 35 U.S.C. § 112, first paragraph, as based on a disclosure which is not enabling. The presence of magnesium in the claimed compound appears to be critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). See applicant's remarks in the paragraph bridging pages 4 and 5 in the last amendment

The Minagawa Declaration filed under Rule 132 has been considered, but is not convincing of error in the rejection, since applicant's claims have not been amended to require the presence of magnesium. It appears from applicant's specification that the inclusion of magnesium is required to provide a chemical composition exhibiting a single diffraction peak at $2\theta = 33$ to 50° .

Applicant's argument, that claim 1 has been amended to contain the presence of magnesium, is not convincing, since claim 1 does not require the presence of magnesium.
